

# Pee Wee Midge

The Pee Wee Midge is a good imitation of a midge having problems hatching. It can be fished in the surface film or as a dropper in a two fly rig.

## Materials:

Hook: Scud hook size 18-20  
Thread: Black 8/0 or smaller  
Body: Black Thread  
Thorax: Black Super Fine  
Ribbing: Olive Thread  
Wing: Close cell packing foam or antron  
Bead: Black 5/64 tungsten (Optional)

## Tying Instructions

- Slide the bead onto the hook through the small eye port (optional). Mount the hook in the vise and start the thread behind the eye or bead.
- As the thread is wrapped down the shank, secure the olive thread at the same time. This will keep the profile slim.
- With the tying thread, form a slim body that has a slight taper.
- Bring the olive thread forward (5 wraps) to form a ribbing and tie it off behind the eye or bead. Clip the thread.
- Tie on the wing material so that the wing forms a "U" over the body.
- Form a thorax with the Super Fine Dubbing.
- Tie off and whip-finish. Clip the thread. Apply head cement.
